PC-21 SEMI GLOSS BLACK AT VIVA RAILINGS HEADQUARTERS

Looking for a pop of color on your railing system?

Shown here are the standard colors available. As in all of our railing systems, customization is always a possibility. At VIVA Railings our priority is to provide products and services that match your vision.

Powder coating is an environmentally-friendly option because it doesn't rely on solvents or chemical carriers. Instead, an electrostatic charge holds the paint to the steel, thus eliminating VOC emissions which will help in regards to LEED requirements. In addition, it meets AAMA specifications. Powder coating is durable and scratch resistant so it weathers and retains its original hue better than conventional liquid coatings. Powder coating can be applied to most of our systems.

Please note that the digital swatches of our powder coat and ECM colors may not accurately represent the actual real-life samples. Factors such as monitor settings, lighting conditions, and individual perception can affect the colors you see on your screen. We suggest using the swatches as a general reference for color, shade, and hue, rather than expecting an exact match. For the most precise color selection, we recommend requesting physical samples or visiting our office in Lewisville, TX to evaluate the powder coat colors in person.

Powder Coat - Primary Colors

PC-50 YELLOW

PC-51 AMBER
