

WALL RAIL

DESIGN + ENGINEER + FABRICATE + INSTALL

Our Wall Rail is an additional option available with any of the railing systems for use on stairs or ramps. The standard VIVA Wall Rail uses ingeniously designed conical brackets that can be mounted on drywall, CMU, concrete, tile, stone or steel.

VIVA Wall Rail is primarily offered in standard 1.5" dia. stainless steel but other metal and wood profiles are available as well. Wall Rail also comes with lighted rail options.

#6 SATIN

#6 Satin is a silver-white finish with relatively short linear directional polishing lines. This finish is quite common with SS architectural applications. It is a two-step abrasive polish finish with the equivalent of a 240 grit abrasive.

#8 Mirror is the most reflective finish covered by ASTM Standards. Produced in a similar way as the #6 finish with further buffing. The grit lines are much less visible than the #6 finish but can be seen upon close inspection. The final product is a mirror-like finish.

***#8 Mirror Finish comes at an additional cost to our #6 Finish.**

POWDER COAT

Powder coating is a dry film process, using finely ground particles of pigment and resin which are electrostatically charged and sprayed onto electrically grounded parts.

Designed to withstand extreme temperatures, powder-coating protects against rust and staining, making it a weather-resistant finish for our stainless steel and aluminum railings.

It helps in regards to LEED requirements and in addition, it meets AAMA specifications.
